

Placket Shirt Collar Set & Tape

Fashion Knit Collar Set & Tape Attachment Gives Two-Needle Look to Finished Garment

- Modified industrial safety stitch machines

DESCRIPTION

A clean finish taping folder mounted to a safety stitch type machine behind the edge trimming knife. This folder, combined with a scissor type cutter, allows the collar seam to be taped as the collar is set. Top-stitching the tape and hanging the label in a separate operation produces a flat, uniform collar seam and gives a two-needle look to the finished garment.

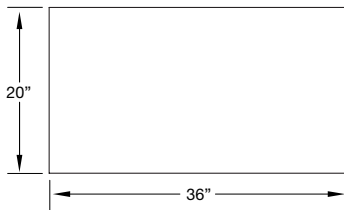

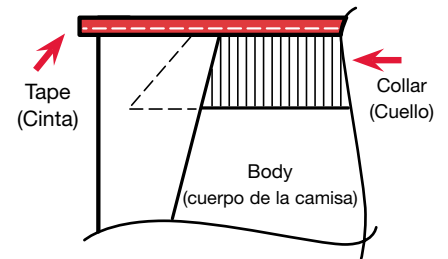

OPERATION

An operator aligns the collar to the shirt and folds the placket over the collar. The shirt is sewn with a single needle 401 stitch to the point where the leading edge is at the tape cutter and the operator touches a knee switch to actuate the cut-apart. Sew continues and the placket is folded over the trailing end of the collar. The tape is cut as sew is completed.
